Epic Practice Overview

Epic Expertise. Experience That Matters.

Leidos Health has the expertise and deep experience to help healthcare organizations implement, optimize, and support Epic's full suite of applications. With one of the largest pools of Epic consultants in the industry, our team has a thorough understanding of Epic clinical, financial, technical, reporting, and access solutions. All of our consultants are certified and/or credentialed, and our team includes analysts, project managers, interface developers, report writers, trainers, and more.
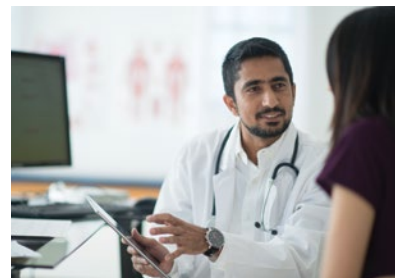

Our team is also experienced with foundation and customized builds, as well as all of Epic's implementation methodologies including All-Terrain, Utility, and Sonnet.

FULL OFFERING OF LIFECYCLE SERVICES

Leidos Health delivers unique insights and best practices in key functional areas. We have assisted more than 240 clients in planning, implementing and optimizing Epic solutions with a focus on reducing costs, making more effective use of data, and improving patient care. We can provide assistance for any stage of your Epic solution, including:

- ▶ IT Strategy
- ▶ Affiliate Strategy
- ▶ Implementation Support
- ▶ Integrated Testing
- ▶ Training and Go-Live

- ▶ Command Center
- ▶ Clinical Service Desk
- ▶ Legacy System Support
- ▶ Upgrade Assistance
- ▶ Epic Accelerator Optimization

Beyond implementation, we can help clients with value-based transformation using our data-driven and analytical approach to creating strategic and operational value through integrated clinical, revenue cycle, operational, and population health management solutions.
