

IT Strategy Solution

PLAN, ORGANIZE, AND OPTIMIZE YOUR TECHNOLOGY

Strategic planning is critical in providing a foundation for governance, management, and execution of IT initiatives. Without this alignment of IT and strategic vision, projects stall, budgets are at risk, and employee morale suffers. Comprehensive IT strategic planning is essential to avoid project failure and rework through the explicit design of systems that further the provision of quality care to effectively compete in your market. Our depth of experience and proven methods can help make you successful.

OUR STRATEGIC APPROACH

Our IT Strategy and Business Planning solution provides many benefits for your organization, including:

- ▶ A process that aligns the organization's vision to achieve organizational strategic, operational, and financial goals
- ▶ An evaluation and optimization of impacts of technology on organizational culture, collaboration, and work life
- ▶ Development of IT departmental organizational structures based upon national leading practices
- ▶ Development of long-term strategies to rationalize IT investments to achieve return on investment and meet the changing requirements for care delivery

EXPERTISE

We draw upon a large pool of industry leaders, former CIOs, and consultants from all disciplines who:

- ▶ Average more than 24 years of experience in healthcare and healthcare IT
- ▶ Have provided strategic planning assistance to over 70 clients, including some of the largest, most prestigious healthcare organizations in the U.S. and Canada
- ▶ Provide expertise and actionable recommendations proven in the market

This breadth of experience allows us to quickly assess your organization's IT strategy and its ability to support financial, operational, clinical, and technical planning.
