**ENTERPRISE IT MODERNIZATION**

With decades of high-level program experience developing and overhauling legacy enterprise IT infrastructure, networks, and systems, including data center modernization and application rationalization, we help our customers achieve their missions and IT business goals by delivering purpose-built solutions, cybersecurity as a standard, efficient project delivery, and end-user satisfaction. Leidos has the depth and scale to provide IT processes, playbooks, enterprise services, tools, and training to meet mission requirements at speed.

**DATA SCIENCE AND ENGINEERING**

We use our tools and expertise to deliver tailored services and support for large-scale information systems, advanced data analytics, and data engineering across several mission-critical areas. Leidos works with our customers to effectively leverage their data sets for the full life-cycle, using actionable intelligence from disparate data sources, designed for the intelligence community and applicable to all markets we serve.

**CYBER**

Leidos defends the most targeted networks in the world from the most sophisticated attacks, and we help our customers integrate unparalleled cyber solutions tailored to protect their agency or organization’s most critical information and assets. Our team of cybersecurity experts — including cleared developers, solution architects, and key management personnel — bring an established track record for delivering agile, game-changing cyber solutions to modernize the operation and maintenance of network infrastructure, virtualization and cloud migration, and enterprise applications and systems.
