

Advancing the Next Generation of Care

Recognized as a Top 10 Health IT provider, Leidos draws on decades of success to deliver a range of solutions and services designed to meet the healthcare challenges of today. A company of scientists, engineers, and technologists, we deliver a broad range of customizable, scalable solutions to hospitals and health systems, biomedical organizations, and every U.S. federal agency focused on health, including the Department of Defense (DoD), Veterans Affairs (VA), and Health and Human Services (HHS).

Leidos works with customers across the continuum of care from the research lab to the patient bedside. From implementing and optimizing electronic health records (EHRs) to conducting groundbreaking research, to developing and supporting large-scale technology programs, Leidos is helping its customers improve clinical, operational, and financial outcomes – advancing the next generation of care.

LEIDOS HEALTH – DELIVERING OUTCOMES AFFECTING HEALTHCARE

- › Experience supporting 550+ go-live projects involving more than 12,500 resources for 155+ clients and more than 250,000 end users

IMPACTING PRECISION MEDICINE

Advancing more tailored treatments and precise diagnosis

Precision medicine is a prevention-based approach to disease treatment based on an individual's genetics, environment, and medical history to select the most effective prevention and treatment strategies. Our solutions in predictive care have accelerated the development of genomics platforms and advanced precision medicine. Our expertise centers around security, cloud computing, integration of genomic and clinical data, interoperability, and researcher tools to access genomic data.

TRANSFORMING CARE COORDINATION

Transforming how you orchestrate an episode of care

Delivering value-based care with improved outcomes is a priority for hospital systems nationwide. Leidos is transforming the way care management is orchestrated by helping organizations move beyond point solutions that impact only one part of patient's journey. We provide cutting-edge technology and solutions that drive immediate impact — improving care coordination, increasing operational efficiency, lowering total costs, and helping organizations thrive in this evolving healthcare environment.

OUTCOME-BASED SOLUTIONS FROM THE RESEARCH BENCH TO THE PATIENT BEDSIDE

MODERNIZING ENTERPRISE IT

Modernizing the enterprise to drive better outcomes

Healthcare organizations need to combat increasing costs and decreasing reimbursements with innovative technology solutions designed to drive value and maximize investments. Modernizing enterprise IT improves an organization's technology posture, reduces costs, and enables focus on the business of patient care. Leidos partners with organizations to execute modernization and optimization priorities so that you can focus on healing. We absorb burdensome aspects of IT operations so you can focus investments and strategy on providing wellness and care.

IMPLEMENTING AND OPTIMIZING EHR

Maximizing the EHR's untapped potential

Leidos provides a range of services designed to help providers select, implement, and optimize their health IT investments. Realizing the maximum benefits of an EHR system requires innovating beyond the go-live milestone to optimally use the data it possesses and advance outcomes. With proven methodologies, a broad range of services, and deep expertise delivering EHR solutions to hundreds of hospitals as well as the Department of Defense, Leidos has the experience and insight to help optimize your health IT investments.

ADVANCING MILITARY AND VETERANS' HEALTH

Scalable IT solutions improve support to military personnel and their families

For decades, our team of proven innovators has consistently delivered large, complex health programs for the DoD and VA on-time and within budget. We are industry leaders in military and VA health systems, data security, and global EHR implementations. As a trusted partner, our experience and institutional knowledge allow us to improve access to benefits, services, and health records by providing health exams that speed benefit determination, digitization of records eliminating disability backlogs, and interoperability and integrated EHR capabilities through infrastructure and IT modernization.

ABOUT LEIDOS

Leidos is a Fortune 500® information technology, engineering, and science solutions and services leader working to solve the world's toughest challenges in the defense, intelligence, homeland security, civil, and health markets. The company's 31,000 employees support vital missions for government and commercial customers. Headquartered in Reston, Virginia, Leidos reported annual revenues of approximately \$10.17 billion for the fiscal year ended December 29, 2017.
