

Unleash the Power of the Cloud

Leidos specializes in solutions that create unique, innovative, and sustainable competitive advantages for our customers by unleashing the potential of the cloud. With Leidos' CLouDbank, our expert staff and real-world experience makes us the trusted partner for your cloud initiatives.

The Benefits

Technology is essential to executing the processes and procedures that support your core business, and Cloud Computing has revolutionized IT enabling benefits including:

BETTER SCALABILITY

Solution grows as your business grows with scalable computing elements readily available.

INCREASED AGILITY

Improve your speed to market with increased agility.

REDUCE + AVOID COSTS

Reduce ongoing data center costs and avoid future refresh costs.

APPLY APPROPRIATE SECURITY

Manage security costs by correctly assessing your data and selecting the appropriate cloud security controls.

COMPLIANCE WITH ASSURANCE PROGRAMS

CSA, ISO 9001, ISO 27001, PCI DSS Level 1, SOC 1, SOC 2, SOC3, FedRAMP, DoD SRG, NIST, HIPAA.

Our Capabilities

With services ranging from strategy, design and build, migration, managed services, automation, and orchestration, we help our customers along the entire cloud adoption journey.

CLOUD MIGRATION

The Leidos team leverages its system of systems understanding to help organizations determine which platforms or applications should migrate into the cloud now, and which should be part of a roadmap.

DEVELOPING IN THE CLOUD

The Leidos team of cloud experts consider Agile and DevOps within the context of ITIL, and incorporate industry best practices into its processes and designs.

SECURE CLOUD INTEGRATION

Cloud integration is the linking of information flows between cloudhosted applications and other applications hosted in different clouds or the data center.

CLOUD CONNECTIVITY

Enterprise cloud connections enable the interoperability between on-premises resources and public cloud environments. The goal is to create optimal business agility, where the business can adjust or scale according to market demand.

CLOUD MANAGED SERVICES

We help our customers along the entire cloud adoption journey by offering an entire spectrum of cloud services from strategy to migration to ongoing maintenance, and sustainment of that environment.

Our services include:

- Cloud strategy
- Migration readiness assessment and planning
- Application migration
- Complete managed service offering for ongoing management of cloud infrastructure
- Remote and on-site management of the IT infrastructure
- Automation of common activities, change requests, monitoring, patch management, security, and backup services
- Full-lifecycle services to provision, run, and support cloud infrastructure
- Design and development of computer software for cloud storage of data and remote and on-site management of the IT infrastructures of others
- Software as a service (SaaS) services featuring software for providing end-to-end secure segmentation of customer computer environments within the cloud, including virtualization, server, network and storage environments

Our Cloud specialists work side by side with your team to understand your environment and come up with a solution specific to your organization's needs.

Contact us today to discover how Leidos can help your organization leverage the power of the cloud.
