

# NASA Cargo Mission Contract

From hardware and experiments to toothpaste and food, the International Space Station (ISS) crew requires a steady stream of supplies via NASA's Cargo Mission Contract. Leidos plans, processes, and packs critical cargo to keep the orbiting outpost fully stocked.

Leidos completed the busiest period for Cargo Engineering to date, yielding

## 35K+ products

(DECEMBER 2018)

RESULTS SINCE 2011:

**158K** pounds  
of Space Station supplies  
traveling more than  
950,000 miles

**85K**  
individual pieces  
of flight crew equipment  
processed

**650K** decals,  
labels and placards  
produced to support ISS crew  
hardware and science

**5.8K** domestic  
and international  
shipments in support  
of the ISS Program

**3.6K**  
Space Station  
cargo transfer  
bags packed
