

Ambulatory Practice Overview

At Leidos Health, we understand the unique environment of the ambulatory setting and the challenges of today's economic pressures. Consultants in our highly experienced ambulatory practice are committed to helping you automate your processes correctly on the first try, saving you time and money and increasing patient safety and satisfaction. Our experienced team has achieved this over and over again in multiple applications. Whether you are addressing clinical or scheduling issues, Population Health, analytics, revenue cycle functionality, reporting, or infrastructure and technical requirements, our consultants will help you achieve the success you need.
