

Enar Gotlib

SENIOR ICT SOLUTION ARCHITECT

Enar Gotlib is the senior ICT solution architect for Leidos innovation Israel. With an efficient systemic approach, Enar is extensively experienced in leading, managing and launching technology mega-projects (IT and IS), including budget and staff management.

Proficient with complex processes, supply chain, ERP, WMS, CRM and BI systems. Multi-disciplinary matrix management in the fields of software, hardware and infrastructure. Leading long-term planning processes and organizational changes.

A member of various strategic forums, Enar joined Leidos in September 2017 after a 26-year career in the IDF (Lieutenant Colonel). In his last roll he was ERP Program Director for the technology and logistics directorate at the General Staff of the IDF, managing 130 engineers and other professionals. Responsible for Planning, establishing and implementing a multi-year information technology work plan, Enar managed the SAP ERP mega-project with a budget totaling NIS 100 million and over 7,000 users nationwide – considered the most complex IDF project in the fields of supply chain, logistics, maintenance, planning and budgeting.

During his military service, he was responsible for dozens of software projects in the fields of logistics, maintenance, building management, business intelligence, command and control, etc.

Enar is a graduate of the IDF's College of Defence Studies, Higher Command and Staff Course, holds Master's in logistics and management, BA in Economics and Logistics (Hons), from Bar-Ilan University and is a Certified Information Systems Analysis from the Technion - Israel Institute of Technology.
