

From the Leidos NGEN-R SMIT Program Team,

On behalf of our team, I'd like to share some thoughts about the NGEN-R program—we're eager, excited, and honored to support our valued customer. As such, we've been preparing an effective strategy to ensure a smooth, seamless transition in as the new Prime contractor for the NMCI, MCEN, and One-Net.

I know many of you may be interested in learning more about next steps for continuing employment with the incumbent program. Please know we're interested in speaking with and interviewing all employees on the current contract—we're looking forward to meeting the powerhouse talent behind the program.

To help with the process, we've built this page (leidos.com/NGEN-join-us) dedicated to the NGEN-R program. This site will provide you with information about the NGEN-R program and allow you to easily submit your resume for consideration.

During the transition process, Leidos and our subcontractors will be reaching out to staff within their respective scope of work areas to discuss next steps for employment. Please be aware that we are conducting a phased transition approach, so employees will be onboarding during different times throughout the transition process. We encourage you to regularly visit the NGEN-R website to stay informed on when our hiring teams will be in your area; see updates on the program in general; and upload your resume.

If you have any immediate questions please contact our team via email at LeidosNGEN@leidos.com.

We're incredibly excited and resolutely prepared to support our Navy and Marine Corps customers. With NGEN, our goal is to go beyond routine and provide the Navy and Marine Corps with unparalleled Enterprise IT capabilities and comprehensive support that exceeds requirements to enable successful missions today and in the future.

I hope you'll join me on this journey and I look forward to having you aboard the NGEN team.

Didier LeGoff | Leidos

Vice President, NGEN-R Program Manager and Division Manager
