

Non-Conventional Sensors

Leidos is the Nation's leader in providing Non-Conventional Sensors to detect and track low, slow, and other asymmetrical threats in the airspace.

We meet warfighter needs of sensing stressing airborne targets in complex environments with affordable sensors. Applications include Large Area Surveillance, Force Protection, and Border Security among others.

Features	Benefits
High availability	Ensures no gaps in coverage
Persistent capability	Provides 24/7/365 coverage
Low cost per square kilometer	Delivers cost effective coverage
High Technology Readiness Level (TRL 9), mature technology products	Ready to deploy, low risk implementation
Solutions for DoD, CBP, and other critical customer requirements for air surveillance	Proven deployed capability that meets or exceeds customer requirements
Supports broad geographic coverage or point solutions	Supports diverse requirements
Innovative system architecture	Enhances capability (scalability, availability, persistence)

Through our culture of innovation and history of performance, we maintain deep customer trust built on integrity and develop and provide customer-centered capabilities and solutions at speed and scale for execution efficiency. Contact us today to discover how we can help you solve your challenges today and in the future.
