

GeoRover® Level Add-in for ArcGIS® Pro

GeoRover software is a flexible, efficient, and standardized suite of geographic information system (GIS) products to aid in the production and analysis of geospatial intelligence. GeoRover products enhance Esri®-based technology, and mobile technology providing improved data management.

INTUITIVE INTERFACE

GeoRover products focus on making GIS software simple to use. Save steps and extend capabilities in the ArcGIS® Pro platform. The learning curve and training time in the new environment is significantly reduced.

SPEED, EFFICIENCY, PRODUCTIVITY

Save steps and time in your GIS workflow. The import and export capabilities are designed for speed, bringing data quickly in and out of the GIS platform.

FLEXIBLE AND CUSTOMIZABLE

Flexibility is built into our software to cater to a wide array of datasets and geospatial workflows. Custom delimiters and other functions enable the handling of unique file formats.

OUR CAPABILITIES

New Add-in to ArcGIS Pro

GeoRover Level is an Add-in to ArcGIS Pro. Building on the new features in ArcGIS Pro, the GeoRover Level Add-in has 3D capabilities providing the ability to process Z or elevation values in GeoRover data.

- ▶ **Data Import:** Add or update features by importing points, lines, or polygons from coordinates in a delimited text file or semistructured copy/pasted text, Excel® spreadsheets, database (Access®, Oracle®, SQL Server®, etc.), into feature service layers in Enterprise or directly from existing shapefiles or feature classes
- ▶ **Data Export:** Move or update features by importing points, lines, and data outside of the platform to convert layers to transferable .csv or Excel® files
- ▶ **Linked Data:** View linked file (video, images, audio, documents, slides, spreadsheets, databases, etc.), folders, or web sites associated with feature layers
- ▶ **Profile Feature:** Reproduce a series of steps in one click, leveraging previous effort
- ▶ **Batch:** Select multiple profiles to add to queue to import or export files sequentially

TECHNICAL SPECIFICATIONS

The technical specifications are derived from ArcGIS Pro system requirements.

- ▶ Application – Operates in ArcGIS Pro
- ▶ Operating System – Windows 10
- ▶ CPU Speed – Recommended: 4 Cores
- ▶ Memory/RAM – Recommended: 8 GB
- ▶ Monitor – Recommended: Screen resolution of 1024 x 768 or higher

ESRI GOLD PARTNER

The Leidos GeoRover software program is an ESRI Gold Partner, developer, and value-added reseller. Special quantity discounts are available for eligible government agencies and educational institutions.

WHY PARTNER WITH LEIDOS?

Through our culture of innovation and history of performance, we maintain deep customer trust built on integrity and create enduring solutions that improve our world. Within the C4ISR Operation, we provide innovative technologies, unique methodologies, and world-class software and services for customers in the broader intelligence, surveillance, and reconnaissance community.

NEXT STEP

Leidos' GeoRover software provides cost-effective solutions to aid in the production and analysis of geospatial intelligence. For additional information on GeoRover or to request a free quote, please contact us today.

BENEFITS

Level improves and capitalizes on GeoRover Software extension interface familiarity such as that in Locus Track.

- ▶ Faster, more flexible interface for operational use
- ▶ Compatible with any ArcGIS-supported coordinate system
- ▶ Streamlines and enhances the process of importing and exporting 2D and 3D points, lines and polygons
- ▶ Interactive data import/export wizard which includes batch and automation through profiles
- ▶ All tools are compatible with Enterprise (ArcSDE) databases for simple editing
