Have the support of one of the industry's largest and most experienced global service teams

We offer a spectrum of services to help you attain maximum value from your investment while maintaining effective and efficient operations, including on premise, phone and emergency support.

Our customer premise support services include installation and integration, preventative maintenance plans and 24/7 repair at customer site to make certain systems are performing at optimal levels. Leidos has many service options to meet customers' budget, system availability and specific" customer operating requirements. Utilizing our current service plans or customized plans, we provide flexibility to meet customers' needs.

Leidos' team of field service technicians and engineers are strategically located across the globe to ensure rapid response to customers' service needs and maximize system operating availability with repairs completed quickly and efficiently.

THE LEIDOS ADVANTAGE: LEIDOS' TEAM OF FIELD SERVICE TECHNICIANS AND ENGINEERS ARE STRATEGICALLY LOCATED ACROSS THE GLOBE TO ENSURE RAPID RESPONSE TO CUSTOMERS SERVICE NEEDS AND MAXIMIZE SYSTEM OPERATING AVAILABILITY

Global Project Support: Encompassing All Security Detection & Automation Product Lines

Leidos Global Projects Service Support Team is disciplined in planning, organizing and managing security screening systems installation and integration to achieve critical budget, milestone and performance goals. Whether cargo, checkpoint, checked baggage or another security system installation project, the Global Project team provides customized solutions and management support to turn ideas into reality. Specific services include networking, systems integration, construction, system upgrades, consultation and equipment replacement.

Leidos' Global Projects Service Support Team consists of highly specialized engineers and technicians with the skills to complete the task. We utilize project management principles and tools to execute your security screening program to ensure your goals are met relative to schedule, quality and budget.

Spare Parts & Logistics: Global Network of Regional Centers

Spare part and consumable orders are fulfilled via customer-driven delivery options: overnight, next-flight- out and local courier services. Leidos maintains a global distribution network of regional distribution centers and localized forward stocking locations modeled to support dependable, reliable and expeditious delivery of OEM parts required to support system operational availability. Spare part and consumables stocking levels are managed by an enterprise system designed to forecast our customers' requirements in advance of need.

With close to 100 forward stocking locations, we are able to fill most parts and consumable orders the same day they are received using our global distribution network.

Leidos provides only OEM-specified spare parts and consumables for our products, which are designed to maintain the customer investment for superior detection capabilities built into every Leidos product.

Technical Support:

Available Worldwide 24/7/365

The Leidos technical support team consists of product specialists available to answer all of your technical questions and provide phone or on-site support as required. These individuals lead their product or product line as the top technical authority within service operations. The product specialist serves as the key expert resource to other service team members, as well as the technical interface between service operations, engineering, research and development and product management.

Training Options:

Guiding Principles

With thousands of security personnel trained annually, Leidos provides training services to meet our customers' growing and changing needs. This is achieved by consistently providing quality and responsive training solutions, allowing customers to fully utilize Leidos products at their maximum efficiency.

Our guiding principles include: commitment to total customer satisfaction, flexible training options and having experienced, enthusiastic instructors.

Our technicians are OEM certified on multiple products and highly skilled in debugging printed circuit boards, power supplies and other complex computer or electrical component

The Leidos technical support team consists of product specialists available to answer all of your technical questions and provide phone or on-site support as required.
