

# NASA Cargo Mission Contract

From hardware and experiments to toothpaste and food, the International Space Station (ISS) crew requires a steady stream of supplies via NASA's Cargo Mission Contract. Leidos plans, processes, and packs critical cargo to keep the orbiting outpost fully stocked.

Leidos Engineering Team designed, developed, and certified over

**2.5K** hardware  
**items** in the last two years  
for the ISS and Orion Programs.

JANUARY 2022

## RESULTS SINCE 2011:

**247K** pounds  
of hardware traveling  
more than 950,000 miles

**115K**  
individual pieces  
of flight crew equipment  
processed

**900K** decals,  
labels, and placards  
produced to support ISS crew  
hardware and science

**8.4K** domestic  
and international  
shipments in support  
of the ISS Program

**5.2K**  
Space Station  
cargo transfer  
bags packed
