IMPROVE MISSION READINESS THROUGH INNOVATION

PROCUREMENT

Robust supplier network provides cost savings, reduced lead times, and high material acceptance rates.

INVENTORY MANAGEMENT AND DEMAND PLANNING

Historical demand informs acquisitions, achieves savings in holding costs, and drives best value-based solutions.

LOGISTICS - ORDER PROCESSING AND RETURNS

Highly scalable receiving, packaging, bulk distribution, e-fulfillment, and services such as device testing.

REVERSE LOGISTICS

Automated return processing and streamlined refurbishment and re-commerce.

HOLISTIC WAREHOUSING AND DISTRIBUTION SYSTEMS

Optimal warehousing and distribution design with continuous improvement and innovation so that items can get anywhere in the world in 7 days or less.

Visit our distribution hub in Nashville, Tennessee or our repair and air transportation hub in Memphis, Tennessee to see our logistics capabilities, innovative solutions, and evolving technology first-hand.
