Revolutionizing the Future of Health

LEIDOS DELIVERS INNOVATIVE SOLUTIONS THAT ENABLE BETTER HEALTH OUTCOMES FOR ALL

As a leading provider of data-driven, value-based solutions for federal healthcare agencies and non-federal customers across the healthcare ecosystem, we believe today's complex health challenges call for revolutionary problem-solving. Our mission is to deliver secure health solutions to improve health outcomes and efficiencies. By bringing our expertise in implementing and optimizing electronic health record (EHR) systems, enterprise IT and network modernization, cybersecurity, and other health services to bear, we deliver solutions that provide immediate benefits aimed at our customers' most important needs. Our multi-domain knowledge of the underlying science enables us to take a disciplined, efficient, evidence-based approach that distinguishes our integrated solutions.

Our scientists, engineers, technologists and clinical teams draw on decades of success to deliver a broad range of customizable, scalable solutions to hospitals and health systems, biomedical organizations, and every U.S. federal agency focused on health, including the Department of Defense (DOD), Veterans Affairs (VA), and Health & Human Services (HHS).

We work with customers across the continuum of care from the research lab to the patient bedside. From leading digital transformation of medical records and other supporting systems to conducting groundbreaking research to developing and supporting large-scale technology programs, we help our customers improve clinical, operational, and financial outcomes – designed to revolutionize the future of health.

DELIVERING OUTCOMES THAT AFFECT HEALTHCARE

▶ Leads one of the largest **EHR implementations in the world for nearly 10 million service members and their families** in more than 2,200 locations and 15 countries

▶ Developed the National Healthcare Safety Network (NHSN), the **nation's most widely used healthcare-associated infection tracking system**, used in **25,000 health facilities** in all 50 states

▶ **Partnering with Indian Health Service (IHS) for 14 years** to modernize the dental support capability by moving from the existing legacy Resource and Patient Management System (RPMS) **dental** module to a best-in-breed **COTS solution at more than 300 locations** in the IHS/Tribal/Urban network

▶ Operates more than **90 medical clinics** and **six state-of-the-art mobile medical clinics** across the United States through a network of more than **15,000 physicians** across **50 different specialties**, providing over **9 million exams** to Veterans in clinics and remote locations

▶ **2,400+ employees** waging **war on cancer** and safeguarding millions of lives by manufacturing **novel vaccines** for international Ebola, Malaria, Zika, and HIV clinical trials at the Frederick National Laboratory for Cancer Research

▶ Processes more than **120 million Medicare transactions** monthly

leidos

Our Capabilities

MILITARY & VETERANS HEALTH SOLUTIONS

A complete range of healthcare delivery solutions and IT services for federal agencies with some of the largest populations in the world.

▶ EHR System Integration, Deployment, Adoption, and Sustainment

▶ Health Information Exchange/Data Interoperability

▶ Human Performance and Behavioral Science

▶ Health Information Security

CIVILIAN HEALTH SOLUTIONS

Mission-enabling technology, science, and human-centered design to create efficient, secure, and scalable operations for better healthcare and better outcomes.

▶ Public Health

▶ Secure Agile Development and Operations

▶ Artificial Intelligence and Machine Learning

▶ Enterprise Information Technology

DIGITAL HEALTH SOLUTIONS

From upgrading EHRs to applying machine learning, our solutions apply state-of-the-art IT to healthcare.

▶ Managed IT Solutions

▶ Advanced-Data Analytics and Visualization

▶ Health Information Security

▶ Digital Modernization

▶ Cybersecurity

▶ Cloud Managed Services

LIFE SCIENCES

Ground-breaking, cost-effective research and development advancing all areas of the biomedical sciences.

▶ Biomedical Research Management

▶ Cancer, HIV infection, and Emerging Infectious Diseases

▶ Drug Identification and Development

▶ Virtual Pharma

EXAMS & DIAGNOSTIC SERVICES

A national network of medical professionals and facilities that optimizes time and costs in a range of services serving veterans across the country, including rural and underserved communities.

▶ Compensation and Pension Health Examinations

▶ Disability and Disability Retirement Examinations

▶ Population Health Surveillance, Immunizations, and Vaccinations

▶ Diagnostic and Laboratory Testing

▶ Occupational Health Services

KEY CUSTOMERS

▶ Defense Health Agency

▶ U.S. Department of Health & Human Services, including HHS family agencies

▶ Indian Health Service

▶ Department of Defense

▶ U.S. Department of Veterans Affairs

▶ Social Security Administration

▶ Hospitals and Healthcare Facilities

PROVEN SUCCESS

▶ Department of Defense Healthcare Management System Modernization: MHS GENESIS

▶ Department of Defense Military and Family Life Counseling

▶ Indian Health Service Electronic Dental Record (EDR) Deployment

▶ Centers for Medicare & Medicaid Services End-User Centric IT Support

▶ Armed Forces Health Longitudinal Technology Application (AHLTA)/Composite Health Care System (CHCS) Enhancement and Sustainment Infrastructure Operations Services Support

▶ Centers for Medicare & Medicaid Services Infrastructure Hosting and Centralized Communication Services

▶ Defense Health Agency Reserve Health Readiness Program III

The Core Capabilities at the Heart of Our Enterprise

Our technical core capabilities underpin the work we do for our customers and are supported by our enabling technologies.

DIGITAL MODERNIZATION

We develop mission-focused solutions to accelerate our customer's digital transformation objectives by delivering resilient enterprise IT solutions and managed services that leverage trusted AI and full-spectrum cyber to decrease burdens and vulnerabilities in complex IT operations.

CYBER OPERATIONS

We use intelligent automation and AI/ML-driven analytics, combined with our experience in detecting and mitigating complex security breaches and threat actors, to deliver cyber solutions that protect and defend the nation's largest and most attacked mission-critical networks and cyber-physical systems.

MISSION SOFTWARE SYSTEMS

Through disciplined processes, common tools, reusable frameworks, automation, collaboration, and domain expertise, our mission software systems are designed to deliver secure, mission-quality software at Silicon Valley speed.

INTEGRATED SYSTEMS

Built on the foundations of agility, modularity, extensibility, and open standards, we deliver high-performing hardware and software systems to solve challenges in an array of specializations, including sensors, virtual training, cargo inspection/baggage handling, autonomous unmanned systems, and space systems.

MISSION OPERATIONS

Enabled by enhancing technology and agile, flexible, and scalable processes, we leverage our in-depth domain knowledge and mission understanding to provide efficient solutions that are secure and resilient and support our customer's critical missions.

ENABLING TECHNOLOGIES

Our enabling technologies are the backbone of our core capabilities and the focal point for technologies that span our technical core capabilities.

- ▶ Secure, Rapid Software
- ▶ Trusted AI/ML
- ▶ Full-spectrum Cyber
- ▶ Rapid Prototyping and Manufacturing

Why Partner With Leidos

Our unique position as a total health company with deep technology expertise equips us to improve health outcomes in both federal and non-federal health organizations. From IT and systems integration to life sciences, managed health services, and clinical solutions and services, Leidos charts the course for the future of health.
